teuco perspective

## PERSPECTIVE ENCLOSURE SYSTEM

The shower seen  
from a new perspective.

The pleasure of water, a pleasure for the eyes  
and a pleasure for everyone.  
The new Perspective shower enclosure project.

Beauty and high quality at an affordable price:  
thanks to the design's modern and linear elegance  
and the experience acquired by a great brand  
like Teuco, a world leader in water products.

Perspective. Not just a shower enclosure; a versatile space:  
shower trays, door panels and built-in enclosures provide  
a wide range of solutions to meet your every need.  
Easy to install, thanks to Teuco's special patented system.

Perspective. So that everyone can enjoy  
a high quality design, starting with the shower room.

Perspective is complete freedom of choice, offering a highly flexible range of shower trays, doors and built-in enclosures available in various sizes to create your very own tailor-made shower room.

A good thing about Perspective is the high quality of the materials and the construction technology, both guaranteed by Teuco's strict standards. This means perfect results and durability over time.

## PERSPECTIVE ENCLOSURE SYSTEM

### TEUCO CONSTRUCTION QUALITY: A CLEAR ADVANTAGE

The Perspective system's acrylic shower trays<sup>1</sup> are extremely light yet, at the same time, solid and hard-wearing.

This is because their bases<sup>2</sup> are reinforced with high density polyurethane foam: Teuco's exclusive system.

The usual durability, with less weight.

All doors and wall panels are made from 6 mm tempered safety glass, with the option of choosing Clean Glass: a type of glass which lets drops of water run off much more rapidly without leaving unsightly lime scale deposits.

Technology in total harmony with design: hinges and profiles have an extremely reduced visual impact, so that the transparency and cleanliness of the enclosure outline is enhanced. The hinges, secured with glue and screws, are well-finished so that only a small continuous surface can be seen from the inside. This enhances the aesthetic appeal and eases cleaning.

### MANY POSSIBILITIES FOR THE SHOWER ROOM THAT YOU WANT

The acrylic shower tray has a fundamental design in its round, square and rectangular shapes and comes in a wide range of dimensions: from **80x80 cm** to **90x75 cm**, to fit even in the smallest of spaces, up to the larger dimensions of **160x90 cm**, **160x75 cm** or **140x90 cm** responding to the latest trend in showers.

As for the doors<sup>3</sup>, in addition to the double door and single door versions, Perspective also lets you put the shower enclosure in a recess, in order to exploit all the available space.

It goes without saying that you can choose just the tray or the door. Another strength and characteristic trait of this project lies in the fact that the entire shower room can be provided by Teuco in its built-in version, making the search for single components simpler, as well as ensuring the overall reliability of the enclosure through perfectly matching trays and doors.

### THE COMPLETE RANGE OF TEUCO SHOWER ACCESSORIES

A Perspective shower enclosure comes backed by a leading brand like Teuco in terms of reliability, durability, and assistance.

You can complete your enclosure by choosing from Teuco's range of taps and fittings, designed to match perfectly the essential, modern, clean-cut shower trays and door panels.

You can finish off your Perspective enclosure with one of Teuco's equipped shower panels: multiple functions that can turn a simple shower into a moment of pure pleasure. You can choose the design, colours and materials depending on your taste.

This is the beauty of Teuco: water as an all-round experience. Choose the freedom and versatility you need.

- End pieces  
for anti-flood profiles:  
Chromed ABS

## PERSPECTIVE ENCLOSURE SYSTEM

### Versatile and innovative also in terms of installation

Another point of innovation lies in the multiple installation possibilities: Perspective shower trays can be positioned in a traditional way – i.e. before the floor and wall tiles are laid – as well as after the tiles have been laid. In this second instance, Teuco provides, as an option, the innovative and practical patented pre-installation kit comprising a bowl containing a concealed drain and wall mounted and finishing profiles. This kit eliminates mistakes being made during the drain fitting and reduces the risk of damaging the shower tray during tiling. There is also the possibility of positioning the undertile tray and the doors only after all tiling has been completed, as well as the possibility of their easy removal later on, if required.

#### SHOWER TRAY PRE-INSTALLATION KIT: ASSEMBLY PHASES

1. The **bowl** is positioned directly on the floor. The polystyrene lid protects the bowl until all tiling is completed. Firstly, the **concrete\***, is laid using the upper surface of the bowl edge as reference. Then the tiles are laid against the edges of the polystyrene lid.

\*CAUTION REGARDING THE CONCRETE: the installation is carried out allowing for a final height of at least 90 mm, including the thickness of the tiles.

2. The **L-shaped profiles** are placed along the two wall sides to mark the space where the shower tray will be fitted. The profiles will be used as reference points for wall tiling which will be done by laying the tiles against the top of the L-shaped profile.
3. Once the tiling is completed, the bowl's polystyrene protection is removed and the undertile is put in place. The wall finishing profiles are then fitted. Lastly, the glass doors are fitted.
