SOFT

The shower enclosure you always wanted

A unique proposal to tailor your shower enclosure to your taste.

Even those with the most sophisticated of tastes can now see their wishes come true thanks to a range of appealing and attractive shower enclosures and shower trays: shower trays made of materials with a natural feel, glass doors, and a wide choice of round or rectangular shapes and sizes.

This range lets you create a wellness space that is not only aesthetically pleasing but also technologically advanced, easy to install and perfectly designed.

In fact, the installation system is a Teuco patent: easy, risk-free assembly, completely adaptable.

The Soft project merges the flexibility of "customised" products with the reliability of a solid leading manufacturer.

The prestigious design is by Scholpp.

MULTI-MATERIAL AND LIGHT DESIGN

The choice of shower tray materials and finishes is truly remarkable, each one of them offering a pleasant new sensation.

Stone: prestigious décor and a natural feeling, stone provides pleasant visual and tactile sensations.

A unique experience in your bathroom.

Duralight Stone: a blend of quartz and resins which provides the appeal of stone and the compactness of synthetic materials. For an aesthetic result that is absolutely natural, highly resistant and durable.

The panels enhance the purity of glass thanks to some special features. Profiles are minimised, the single hinge conceals the adjustment mechanisms. A combination of technical features and design outlining the rigorous lines that characterise all the shower enclosures in the Soft range. The hinge is not fixed to the glass panels by screws or joints but by a special glue that makes this product even more aesthetically pleasing and reliable.

PATENTED INSTALLATION

The installation system is a Teuco patent: all shower enclosure elements (shower tray and glass panels together) can be fitted once the tiling is completed, thus remaining protected until installation is complete.

With the special **pre-installation kit** (a Teuco patent), the main elements are assembled before walls and floors are tiled, which makes it possible to:

- _ increase the reliability and resistance of the finished product
- _ install the shower tray (and the glass panels) at the very end thus protecting them from possible damage; in fact, the kit itself provides a reference level for the tiling work and marks the space required for the shower tray installation once the building work is complete.
- _ increase flexibility and simplify installation.

A number of technical features on the shower trays and hinges make this product suitable for all spaces, including imperfect ones (askew, out of plumb) for total reliability.

AMPLE RANGE OF CONFIGURATIONS

The shower tray is available in two versions: PROFILE (above-floor) and FLAT (flush with the floor).

Dozens of "Soft" shower enclosure configurations are available, all equally elegant, by combining the shapes, dimensions and materials of the shower tray with different types of glass panels. The shower trays can also be purchased separately, without the matching enclosures.

Teuco provides a choice of larger shower trays such as the 140x90 and 160x90: Teuco responds to the main shower enclosure market trends by broadening the available range within the Soft project.

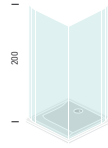

Seeing one's creativity materialise has never been easier.

UNLIMITED

When the shower room is truly customised

Dimensions and versions: everything in this highly versatile project can be chosen. Thanks to the Teuco Unlimited shower enclosures, the time has come to create customised shower rooms to meet your specific needs. You choose the dimensions, you choose the version: door panel and taps and fittings, water functions, without limitations and very simply.

Quality materials and innovative solutions

For every component of Unlimited Shower Enclosures, Teuco:

- has selected materials that guarantee solidity and long life
- has used design and construction solutions that afford considerable advantages during assembly and use for the entire product life span.

**Dimensions:
custom-made**

Unlimited shower enclosures can accommodate any dimensional requirements: from the 80x90 cm enclosure to the large 200 x 120 cm model. The length and width of the shower tray and wall panels vary by the centimetre to allow all your dreams to come true.

The inside of the shower tray can be chosen from one of three different shapes (free basin, with slats or with footboards) and even the **method of installation** (above the floor or flush with the floor) can be selected according to your needs.

The choice of **door versions** is just as extensive: fixed glass, hinged door or sliding door and positioning in the centre of the wall, in the corner or recessed.

The uninterrupted continuity of the glass panels are an essential characteristic of Unlimited shower enclosures; hinges, profiles and supports have been minimised to leave room only for the transparency of glass.

**Choose the features:
with Teuco, top design and technology**

By choosing and combining the water features inside the enclosure, obtaining a unique wellness area will be kid's play: modular ceiling-mounted central shower heads or wall-mounted central shower heads, shower support rods, multifunction jets and massaging strip for water massages.

All the taps and fittings are controlled using the mixer tap and matching diverter. A series of accessories (towel rails and shelf) featuring a matching design add to the range on offer.

Thanks to Unlimited shower enclosures, you can achieve very personal shower rooms, that can guarantee the utmost construction integration and ease of assembly.

To date, solutions with such a charming appeal could only be achieved by combining different elements that were not integrated with one another (shower trays, door panels, taps and fittings each from a different manufacturer). The Unlimited system now offers you an exhaustive range where every component is guaranteed by manufacturing processes, quality and control levels worthy of an industrial company ranked leader in its field.

Duralight®: precious qualities

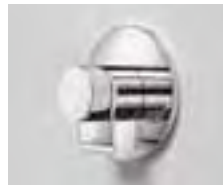

The shower trays in the Unlimited collection are made of **Duralight®**, a composite material patented by Teuco.

Both innovative and surprising, Duralight® offers benefits such as:

- _ A pleasant experience upon contact with the material
- _ Resistance to heat and to UV rays: no yellowing and inalterable colour.
- _ High resistance to shocks, scratches and abrasions (twice that of polyester compounds).
- _ Easy to clean

Installation: versatile solutions

The shower trays in the Unlimited shower enclosure system can be chosen either in the version above the floor or **flush with the floor**. The positioning of the shower trays above the floor can be carried out traditionally, before the floor and walls are tiled, but the shower tray can also be laid only once the tiling work is completed, thus protecting the shower enclosure against accidental damage until the very last minute. The **preinstallation kit** (which can be ordered separately) must be positioned, whatever the chosen method of installation, before the concrete is laid.

Versions for a perfect end result

The doors are made of high quality 8/10 mm thick tempered glass, in the transparent or extra-clear finishes.

Clean Glass is always available: it is the exclusive Teuco limescale removing treatment for glass panes. Thanks to Clean Glass, drops of water slide off the surface, leaving the glass clear at all times. Any small limescale deposits are easily removed, guaranteeing safety and hygiene without having to use environmentally-unfriendly detergents.

The **taps and fittings** include ceiling-mounted or wall-mounted central shower heads, multifunction jets and massaging strip, which are controlled using the mixer tap and matching diverter.

The advantages offered are:

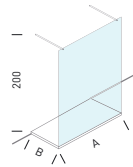

- _ high quality of the materials used (chromed brass)
- _ efficient during use even with little water pressure
- _ simplified assembly solutions
- _ matching design.

WILMOTTE

Geometry becomes essence

A bathroom furnished with Teuco's Wilmotte collection is a unique and unmistakable "designer" bathroom. Every element merges the purity of forms to the distinctive designer's touch: the typical recess in the material containing the chromed plate.

The acrylic shower tray – with basin - featuring rigorously geometric forms, is available in several dimensions: from the 90x90 square to the 100x80, 120x80, 140x80 rectangular versions.

These shower trays are flexible not only in terms of dimensions but also in terms of installation options – above the floor or flush with the floor. The beauty of Teuco technology meets the beauty of a great designer.

PERSPECTIVE

The shower seen
from a new perspective.

The pleasure of water, a pleasure for the eyes
and a pleasure for everyone.
The new Perspective shower enclosure project.

Beauty and high quality at an affordable price:
thanks to the design's modern and linear elegance
and the experience acquired by a great brand like Teuco,
a world leader in water products.

Perspective. Not just a shower enclosure; a versatile space:
shower trays, door panels and built-in enclosures provide
a wide range of solutions to meet your every need.
Easy to install, thanks to Teuco's special patented system.

Perspective. So that everyone can enjoy
a high quality design, starting with the shower room.

Perspective is complete freedom of choice, offering
a highly flexible range of shower trays, doors and built-in
enclosures available in various sizes to create
your very own tailor-made shower room.

A good thing about Perspective is the high quality of the materials
and the construction technology, both guaranteed by Teuco's strict
standards. This means perfect results and durability over time.

**TEUCO CONSTRUCTION QUALITY:
A CLEAR ADVANTAGE**

The Perspective system's acrylic shower trays are extremely light yet, at the same time, solid and hard-wearing.

All doors and wall panels are made from 6 mm tempered safety glass, with the option of choosing Clean Glass: a type of glass which lets drops of water run off much more rapidly without leaving unsightly lime scale deposits.

Technology in total harmony with design: hinges and profiles have an extremely reduced visual impact, so that the transparency and cleanliness of the enclosure outline is enhanced. The hinges, secured with glue and screws, are well-finished so that only a small continuous surface can be seen from the inside. This enhances the aesthetic appeal and eases cleaning.

**MANY POSSIBILITIES
FOR THE SHOWER ROOM THAT YOU WANT**

The acrylic shower tray has a fundamental design in its round, square and rectangular shapes and comes in a wide range of dimensions: from **80x80 cm** to **90x75 cm**, to fit even in the smallest of spaces, up to the larger dimensions of **160x90 cm**, **160x75 cm** or **140x90 cm** responding to the latest trend in showers.

As for the doors³, in addition to the double door and single door versions, Perspective also lets you put the shower enclosure in a recess, in order to exploit all the available space.

It goes without saying that you can choose just the tray or the door. Another strength and characteristic trait of this project lies in the fact that the entire shower room can be provided by Teuco in its built-in version, making the search for single components simpler, as well as ensuring the overall reliability of the enclosure through perfectly matching trays and doors.

THE COMPLETE RANGE OF TEUCO SHOWER ACCESSORIES

A Perspective shower enclosure comes backed by a leading brand like Teuco in terms of reliability, durability, and assistance.

You can complete your enclosure by choosing from Teuco's range of taps and fittings, designed to match perfectly the essential, modern, clean-cut shower trays and door panels.

You can finish off your Perspective enclosure with one of Teuco's equipped shower panels: multiple functions that can turn a simple shower into a moment of pure pleasure. You can choose the design, colours and materials depending on your taste.

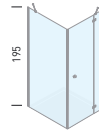

This is the beauty of Teuco: water as an all-round experience. Choose the freedom and versatility you need.
