THE TURKISH BATH, LIKE A HAMMAM 100% steam

The efficiency of a Teuco Turkish bath is unrivalled. The pleasant and beneficial effect on the body – which is completely surrounded by steam at a constant temperature – is the same you would achieve in a hammam. The promise of health and beauty can be fulfilled only if the temperature is kept constant and uniform throughout the shower enclosure (between 40° and 50° C).

These requirements are fully met because in Teuco shower enclosures:

- _ the steam quickly reaches the set temperature and keeps it constant during the entire treatment, thanks to the innovative system and electronics that allow temperature control through the action of a small boiler and adjustable electric heating elements;
- _ the exclusive steam recirculation system which makes the temperature uniform is active.

EVOLUTION PROJECT

The shower without boundaries

Evolution is the new era of showers:
extremely high profile enclosures
capable of giving you strong emotions.

The clean and geometric design is based
on the use of glass: light, invisible and yet resistant.
The 8 mm thickness makes it solid and the exclusive
Clean Glass anti-limescale treatment, available
in all versions, keeps the original glazing effect.

The Duralast® shower tray - designed,
processed and patented by Teuco - is made
with an acrylic composite material that merges
high performance with a unique texture to ensure
prestigious design and pleasant tactile sensations.

Outstanding wellness functions:
100% steam Turkish bath and all water massages.

A highly customisable model thanks to the options
available in the FULL range and LIGHT range.

MULTI-FUNCTION SHOWERS

An endless source of well-being

The 100% steam Turkish bath, the energising shower and the localised massages are all unique pleasurable experiences available thanks to Teuco multi-function showers.

Reliable well-being guaranteed by quality construction and materials, such as the high quality acrylic which helps to keep the temperature inside the enclosure constant by insulating it from the outside, which is durable and eco-friendly as it can be recycled. Teuco shower enclosures have the robustness of an indestructible product.

Furthermore, the exclusive Next solution makes Teuco multi-function showers easy and quick to install in any setting, thanks to a “built-in recessed” assembly system, a limited number of components and the absence of silicone.

This ensures they are durable in time, easy to clean and maintain as well as being water resistant. Contributing to your pleasurable wellness experiences.
